

Give the front desk a response queue, not another list of calls.

Prepared for: [CLIENT BUSINESS] | Prepared by: [PROVIDER]

THE NARROW OUTCOME

Every reminder produces a typed status or a staff-owned exception.

A scheduled, idempotent task prepares the approved reminder and routes each response to confirm, reschedule, stop, or staff review.

PROPOSED WORKFLOW

01	Select due reminders Privacy-minimized reminder queue	Practice approves source system, BAA coverage, consent, and minimum fields
02	Prepare the reminder SMS payload awaiting authorized provider send	No SMS sends from this starter
03	Route confirm or reschedule Typed front-desk task or confirmation	Ambiguous and sensitive responses route to staff
04	Prepare the balance handoff Pre-visit balance task	No payment link or live charge from this starter
05	Close the appointment loop Typed follow-up with idempotency receipt	Practice controls all patient-facing content

COMMERCIALS

IMPLEMENTATION	MANAGED CARE
\$1,500 one time	\$249 / month
Configuration, branded proposal template, test pass, and team handoff.	Monitoring, small fixes, and one monthly workflow tune-up.

BOUNDARIES AND ACCEPTANCE

This starter does not activate live payments, send customer communications, or deploy into a production customer account. Final scope, data handling, integrations, and acceptance tests must be approved in writing before implementation.
